👤 CAREER PROFILE

Senior developer with experience in delivering complex systems. My main focus is fullstack Java development and Scrum Master, where I have worked with distributed systems in an architecture with micro-services and rest APIs, frameworks such as Angular and Hibernate in a CI/CD environment with tools such as git, Jenkins, and Jira. I am fully comfortable working agile and has experience with Test Driven Development as well as taking on the role of the team's scrum master. My ambition is for projects to deliver value to the customer, but also for the team to continuously improve their productivity and quality.

🎓 EDUCATION

Certified Kubernetes Administrator (CKA)   2023 - ongoing
The Linux Foundation and the Cloud Native Computing Foundation (CNCF)

Routing and Switching Essentials

Cisco Certified Network Associate CCNA1   2016
Introduction to Networks

Bachelor of Science - BS, Computer Engineering   2015 - 2018
KTH Royal Institute of Technology

💼 EXPERIENCES

Consultant   2022 - Present
IP Solutions

I have been working on in-house projects. The focus has been to improve my knowledge in cloud.

Team Lead / Scrum Master   2019 - 2022
CSAM Health

Detailed Achievements:

- Learn much more about Scrum while learning / improving the team.
- Experience how it is to lead a distributed team, since half of the team is in Cebu.
- Learned about PRINCE2 project management methodology, since I was team leader, I needed some knowledge about PRINCE2.
- Got a Scrum Master certification one more time.

Fullstack developer   2019 - 2022
CSAM Health

I was always curious about trying the role Scrum Master, so when i got the opportunity, I accepted the challenge. I already had a Scrum Master certificate, but it was different to actually work with it.

Detailed Achievements:

- Gained my Java knowledge
- Learned much more about Angular, since I had most knowledge about it in the team.
- Worked on a very complex system with many moving parts for the first time. For that complex system we had a small team, so I got multiple responsibilities.
- Worked with DevOps related issues. We dockerized the whole application, and used that in our local environment.

Engineering Trainee as a developer   2018 - 2019
ASSA ABLOY

Detailed Achievements:

- Worked on a cloud based system, and got introduced to AWS for first time.
- Learned about / experienced Domain Driven design.
- Learned about / experienced Test Driven Development.
- Worked with micro services
- Learned about consumer driven contract testing.

Consultant   2018 - 2019
YABS AB

Detailed Achievements:

- Became a certified Scrum Master
